Aid Director Frailey clarifies increases in tuition, scholarships

By Geoff Russell

In order to correct the misapprehensions shared by a portion of the student body concerning the announced increases in tuition and financial aid, Director of Student Aid Jack H. Frailey has asked The Tech to help him clarify several points.

Mr. Frailey emphasized that over \$500,000 of the increase in aid had been budgeted before the tuition hike was voted upon, and that an additional \$200,000 was allotted to compensate for the increased tuition. He also made it clear that none of the funds used to provide the increase include money derived from the tuition boost. Last, he stated that current endowment assets will not be diminished by the increase in aid, and that the Institute is undertaking a program to increase endowments.

Here are some of the facts about the present aid program, as well as some of the projected changes. Scholarships awarded by MIT total approximately \$300,000 for this academic year. About \$800,000 will be added to that total for next year. In addition, there are approximately \$750,000 in scholarships available from outside sources, bringing the scholarship funds available for 1966-67 to about \$2,350,000. Loans may increase that total by as much as \$900,000. bringing total aid from all sources to \$3,250,000. Frailey stated that MIT now has the funds to meet the needs of all its undergraduates.

Mr. Frailey emphasized that his department recognizes the increased need that the average student will experience from the tuition increase, and made it clear that it will be unnecessary for aid applicants who filed their applications on the basis of a \$1700 tuition rate to refile at the increased rate. Students who wish to file an application for aid as a result of the increased cost still have until January 28 to do so.

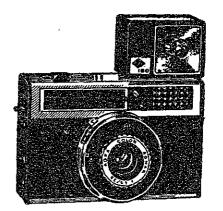

Brubeck shot at M.I.T., Dec. 3, 1965

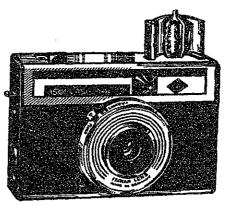

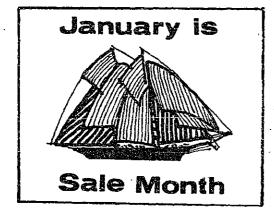

At 4:00 P.M. on December 3, Dave Brubeck, well-known jazz musician, was shot at M.I.T. The shooting took place at the Tech Coop. Witnesses report that Brubeck was shot approximately 90 times. The shots fired, in most cases, came from Agfa Isoflash-Rapid, and Agfa Isomat-Rapid. All Agfa cameras and

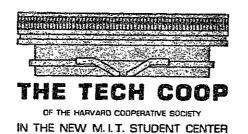

equipment are available at the Photographic Department of the new Tech Coop, including Agfa's ISOFLASH-RAPID priced at only \$14.95 complete with film, built in flash gun and four flash bulbs. Featuring a squeeze type shutter release, optical viewfinder and West German lens, this fine camera also comes in an attractive kit with deluxe carrying case for \$17.45. Other Agfa Rapid cameras are priced at \$44 and \$86.

Of course we can't guarantee that you'll have another chance to aim your Agfa at Brubeck, but why not shoot friends?

Exhibition on next week

Applications due for weekly classes offered by Student Center Art Studios

MIT student art work will be exhibited next week in the lobby of the Student Center Library, according to Mrs. Mirni Luft, head of the Student Center Art Studios.

The artwork is primarily that completed by members of Mrs. Luft's classes, which meet weekly Tuesday and Wednesday nights from 7:30 to 9:30 p.m. in the art studios located on the fifth floor of the Student Center.

The Tuesday class includes oil painting, while that on Wednesday is mainly concerned with drawing with life and portrait models.

Open to anyone in the MIT community, the classes entered their first year this past Septem-"Beginners shouldn't be afraid to come over and try their explained Mrs. Luft. hand,'' "Almost everyone is just start-

next term. "The interests of the students involved will determine to see me on any Monday or Thursday afternoon or just before one of my classes.'

There will be about 20 students in each class. A fee of \$10 plus locker rental charge of \$2 will make total registration costs \$12. In addition, students in the drawing class can expect to spend \$2-\$3 for supplies, while for those in the oil painting section they will probably cost about \$15. All supplies may be purchased at the Coop.

Volume 85-thanks and farewell

Volume 85 of The Tech has come to an end. To some of us, the last issue seems to come too soon; perhaps to some of our readers, it seems just in time. At any rate, we have tried during the past year to put out an informative, interesting publication for the MIT community. and incidentally, we've enjoyed it immenselv.

The year had its serious moments, its important announcements and philosophical discussions. But we've tried to look at most things in a good humor. Laughing at ourselves and the school occasionally seemed to clear the air a bit.

Now, as it all fades into the past behind us, we'd like to thank all the people we had the pleasure of working with. Outstanding of course was our Chairman. Ken Browning, who was finally able to see the realization of his goal of twiceweekly publication, as well as the newspaper's installment in its new offices in the Stratton Building. Dave Kress as managing editor showed a grasp of both his technical duties and the general phil-

osophy of journalism; next term. Dave will serve The Tech as Chairman of Volume 86.

The business staff, headed by Business Manager Steve Teicher, boosted The Tech's income higher than ever before; Steve's careful financing, plus the gogetting talents of Ad Manager Mike Weidner, made the paper's expansion possible.

News Editor Chuck Kolb, our successor as Editor of Volume 86, provided top coverage and helped strengthen our relations with the Administration. Thanks also to Chuck for his witty Footnotes. which appeared on this page and made our job easier.

Things around the office wouldn't have been the same without our Features Editors Jeff Trimmer and Bob Horvitz. Sports Editors Ted Trueblood and Gerry Banner, and Entertainment Editor Jeff Stokes. Their departments provided much of the enjoyable reading in the paper, as their presence in the office contributed to the enjoyment of the afterncon's work.

Special thanks to Photo Editor John Torode: the darkroom boys really livened up our publication with their action shots and campus scenes.

This year we are especially grateful for the cooperation we received from the Administration: from Dean Wadleigh. Vice-President Kispert, and Public Relations head Jeff Wylie, all of whom met with us weekly; and from Bob Byers and the rest of the Public Relations staff, who were always ready with helpful information and good coffee. And thanks to Beth Bogie, our public relations Girl Friday, now in England.

The new Board will "pursue such purposes as it sees fit," as our constitution says. Whatever those purposes may be, we hope they have as much fun, and learn as much, as we have in our year of operation.

"Only editors and people with tapeworm have the right to say 'we'." We'll Pass find it a relief to return to the singular.

Mail boxes

To the Editor:

May I make a plea for more interdepartmental mail boxes around the school? There is a special need for them at the main exits.

In the rotunda of Building 7. there is not a single box. There is a U.S. mail box opposite the elevator. Could we have an interdepartmental box there too?

encouragement

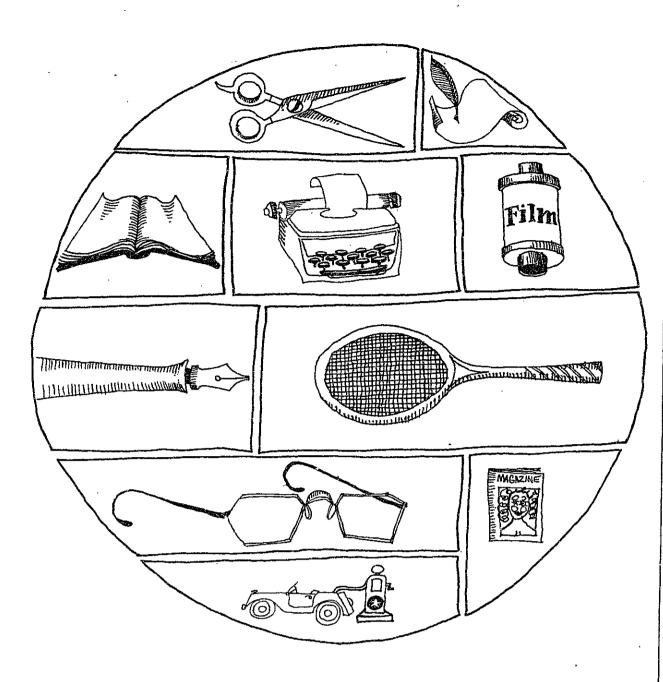

David Tenniswood B.S., Michigan State Univ. M.S., Michigan State Univ.

Opportunity comes early at Ford Motor Company. Graduates who join us are often surprised at how quickly they receive personal assignments involving major responsibilities. This chance to demonstrate individual skills contrasts sharply with the experience of many young people entering the business world for the first time. At Ford Motor Company, for example, a graduate may initiate a project and carry it through to its final development. One who knows is David Tenniswood, of our research staff.

Dave joined Ford Motor Company in July, 1961. Assigned to our steering and controls section, he helped develop a revolutionary steering system that will facilitate driving in future Ford-built cars. Currently a design engineer working on suspension design and analysis, Dave has been impressed by the extent to which management encourages personal initiative among recent graduates like himself. Here, management looks immediately to young engineers, like Dave, for fresh concepts that reflect their academic training and special abilities. Moreover, when the idea is accepted for development, the initiator is frequently given the opportunity to see the job through—from drawing board to production line!

The experience of Dave Tenniswood is not unusual. Ford Motor Company believes that early incentive is fundamental to individual growth and a successful career. If you are interested in a job that challenges your abilities and rewards enterprise, we urge you to contact our representative when he visits your campus.

A World of Service

BARBER ROOM: Eight chairs, experienced barbers, no waiting.

BINDERY: Theses and magazines expertly and inexpensively bound.

BOOK SPECIAL ORDERS: Any book in print can be obtained.

FILM CENTER: Special rates and rapid service for developing and prints.

FOUNTAIN PEN REPAIR: Favorite writing instruments carefully restored to new efficiency

GASOLINE AND OIL: Your Coop's newest service allows you to charge to your Coop account auto needs purchased at Rosetti's Texaco Station, 100 Broadway

at 6th St. (off Kendall Square), and the Crimson Garage, 55 Boylston St. (near Harvard Square).

MAGAZINE SUBSCRIPTIONS: All subscriptions ordered at lowest rates.

OPTICIAN: Professional service conveniently located in the Book Department for quick repairs or leisurely selection.

TENNIS AND SQUASH RACKET RE-STRINGING: Quality materials and workmanship.

TYPEWRITER REPAIR: Service and parts for all makes and models.

1041 ballots cast

The figures after the songs indicate the number of votes which they received out of the 1041 ballots cast. In some cases these figures are adjusted to take into account the length of time which the song was on the ballot, as some songs which performed well as write-ins were added to later ballots. Ties in total number of votes were broken by attaching greater weight to a vote for a song listed as the only one on the ballot than to a song's being listed as one of three.

No national yearly sales ratings are released — only lists which form some linear combination of the number of weeks first, second, third, etc., and tend to attach too much weight to longevity. I have 13 such surveys (two nafor three, on the top three for eleven, and on the top ten for all thirteen. On this basis, it seems that it was indeed the top song

for the year, but certainly not by the amazing 27% plurality and 87 vote lead which it pulled at MIT.

Four songs which were certainly among the top ten sellers of the year with well over one million sales but failed to crack the top twenty here were 'Can't Help Myself,' 'Mrs. Brown,' 'I Got You Babe,' and 'Wooly Bully.'

The newer songs, such as the Sounds of Silence' and 'We Can Work It Out,' were probably stronger than they would have been if the poll had been conducted six months hence. The collegiate drinking songs, such as 'Hang On Sloopy' and the 'Jolly Green Giant,' did better than they did nationally although not quite as well as might have been expected. The Beatles were far and away the top group, drawing 470 votes compared with 347 for the second place Rolling Stones.

WMEX conducted a similar poll tional and eleven cities), and of in which they asked their listenthese 'Satisfaction' ranked first ers to write in their favorite song. Their top ten was 'Yesterday,' 'Satisfaction,' 'Stop in the Name of Love,' 'The Eve of Destruction,' 'Sounds of Silence,' 'Help,'
'I Got You Babe,' 'Hang On Sloopy,' 'Mrs. Brown' and 'This Diamond Ring.' A comparison of our list with this one gives an interesting comparison of high school and collegiate taste. The high school kids must be snowed by the words in the 'Eve of Destruction, which ranked 28th here and picked up more negative comments and votes than any other song.

> The success of this poll seems to indicate that rock and roll is much bigger at MIT than many people would like to believe.

MITCP

Now as the end of the first semester draws near, one fact emerges clearly: you are all going to flunk out of school.

There are two things you can do about it. First, you can marry money. (I don't mean you marry the money itself; I mean you marry a person who has money. Weddings between people and currency have not been legal anywhere in the United States since the Smoot-Hawley Act. Personna® Stainless Steel Blades, on the other hand, are legal everywhere and are, indeed, used with great pleasure and satisfaction in all fifty states of the Union and Duluth. I bring up Personna Stainless Steel Blades because this column is sponsored by the makers of Personna Stainless Steel Blades, and they are inclined to get edgy if I omit to mention their product. Some of them get edgy and some get double-edgy because Personna Blades come both in Injector style and Double Edge style.)

But I digress. I was saying you can marry money but, of course, you will not because you are a high-minded, cleanliving, pure-hearted, freckle-faced American kid. Therefore, to keep from flunking, you must try the second method: you must learn how to take lecture notes.

According to a recent survey, eleven out of ten American undergraduates do not know the proper way to take lecture notes. To illustrate this appalling statistic, let us suppose you are taking a course in history. Let us further suppose the lecturer is lecturing on the ruling houses of England. You listen intently. You write diligently in your notebook, making a topic outline as you have been taught. Like this:

I. House of Plantagenet. II. House of Lancaster

III. House of York.

Then you stop. You put aside your pen. You blink back a tear, for you cannot go on. Oh, yes, you know very well that the next ruling house is the House of Tudor. The trouble is you don't know the Roman numeral that comes after

It may, incidentally, be of some comfort to learn that you are not the only people who don't know Roman numerals. The fact is, the Romans never knew them either. Oh, I suppose they could tell you how much V or X were or like that, but when it came to real zingers like LXI or MMC, they just flang away their styluses and went downtown to have a bath or take in a circus or maybe stab Caesar a few

You may wonder why Rome stuck with these ridiculous numerals when the Arabs had such a nice, simple system. Well, sir, the fact is that Emperor Vespasian tried like crazy to buy the Arabic numerals from Suleiman The Magnificent, but Suleiman wouldn't do business—not even when Vespasian raised his bid to 100,000 gold piastres, plus he offered to throw in the Colosseum, the Appian Way, and Technicolor.

So Rome stuck with Roman numerals—to its sorrow, as it turned out. One day in the Forum, Cicero and Pliny got to arguing about how much is CDL times MVIX. Well, sir, pretty soon everyone in town came around to join the hassle. In all the excitement, nobody remembered to lock the north gate and-wham! before you could say ars longa-in rushed the Goths, the Visigoths, and the Green Bay Packers!

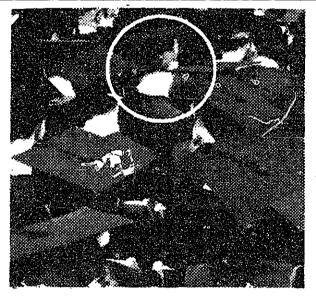

Well, sir, that's the way the empire crumbles, and I digress. Let's get back to lecture notes. Let's also say a word about Burma Shave®. Why? Because Burma Shave is made by the makers of Personna Blades who, it will be recalled, are the sponsors of this column. They are also the sponsors of the ultimate in shaving luxury. First coat your kisser with Burma Shave, regular or menthol-or, if you are the devil-may-care sort, some of each. Then whisk off your stubble with an incredibly sharp, unbelievably durable Personna Blade, Injector or Double Edge-remembering first to put the blade in a razor. The result: facial felicity, cutaneous cheer, epidermal elysium. Whether you shave every day, every III days, or every VII, you'll always find Personna and Burma Shave a winning combination.

Personnam amo, Tom Personnam amat, Dick Personnam amat, Harry Personnam amat, quique Personnam amantet quoque amabitis.

Graduation was only the beginning of Jim Brown's education

Because he joined Western Electric

Jim Brown, Northwestern University, '62, came with Western Electric because he had heard about the Company's concern for the continued development of its engineers after college graduation.

Jim has his degree in industrial engineering and is continuing to learn and grow in professional stature through Western Electric's Graduate Engi neering Training Program. The objectives and educational philosophy of this Program are in the best of academic traditions, designed for both experienced and new engineers.

Like other Western Electric engineers, Jim started out in this Program with a six-week course to help in the transition from the classroom to industry. Since then, Jim Brown has continued to take courses that will help him keep up with the newest engineering techniques in communications.

This training, together with formal college engineering studies, has given Jim the ability to develop his talents to the fullest extent. His present responsibilities include the solution of engineering problems in the manufacture of moly-permalloy core rings, a component used to improve the quality of voice transmission.

If you set the highest standards for yourself, enjoy a challenge, and have the qualifications we're looking for - we want to talk to you! Opportunities exist now for electrical, mechanical and industrial engineers, and for physical science, liberal arts and business majors. For more information, get your copy of the Western Electric Career Opportunities booklet from your Placement Officer. And be sure to arrange for an interview when the Bell System recruiting team visits your campus.

Cagers win squeaker: Mermen rally to win

By Tom Thomas

The frosh basketball squad enjoyed their first win of the season Monday night. In a see-saw battle the frosh pulled out a one point victory over Tufts, 59-58. Led by strength of their fine free throw shooting in the closing minutes.

Tufts stayed with MIT throughout, but Coach Arnie Singal's men refused to fold. The margin was one point at the half, MIT leading 26-25. The win improved the frosh record to 1-7.

Hoopmen lose to Crimson

The hoopmen refused to enjoy prosperity as they immediately lost to Harvard Wednesday night, 89-63. The outcome was never in doubt. High scoring Mike Perry drew 4 fouls in the first half and sat out much of the remaining time.

Stewart (12) and Bill Edwards,
